

# Fuel and Lubricant Antioxidants

Antioxidants improve the resistance to oxidation of transportation and industrial lubricants

Aminic and phenolic antioxidants retard oxidation in the oil by reacting with and stabilizing radicals produced in the lubricant. Phosphite and Thioester antioxidants decompose hydroperoxides.

In engine oils, antioxidants enable drain intervals to be extended. They preserve the integrity of the oil for longer periods, helping to maintain viscosity, reducing deposit and sludge formation, and guarding against the production of corrosion species, whilst protecting oil at higher temperatures.

A comprehensive range of products that enhance the performance and prolong the life of engines and machinery

With more than 50 years' experience in stabilization, SONGWON offers an extensive portfolio of fuel and lubricant additives for automotive, industrial applications and biofuels including aminic, phenolic, phosphite and thioester antioxidants. Close cooperation with customers allows the development of solutions for today and tomorrow, and the range is constantly being expanded to meet market needs.

By improving the performance of lubricants and fuels to ensure that they last longer and help to protect engines and equipment, SONGWON antioxidants also make an important contribution to environmental sustainability.

SONGWON manufactures fuel and lubricant antioxidants at its plant in South Korea, in which it invests continuously in anticipation of new industry requirements. Backward integration of key raw materials and economies of scale help to guarantee availability and reliable supply.

1. This product is acceptable as an ingredient for use in lubricants with incidental food contact (HX-1) for use in and around food processing areas.

2. Meet the European Ecolabel criteria for lubricants and is featured on the Lubricant Substance Classification List (LuSc-list).

# Standard Packaging

- **Antioxidants, Solids:** 20 kg PE Bag
- **Antioxidants, Liquids:** 185 kg Steel Drum  
190 kg Steel Drum  
900 kg IBC  
20 MT ISO Tank

Standard pallet size is CP1 and CP3.

## Transport and Storage

As a general guideline, we recommend storing the products mentioned in this brochure in their original sealed containers in a cold and dry place. For more detailed information on a specific product, please refer to the corresponding **Technical Data Sheet**.

By law, a number of chemical products must be labeled in respect of transport, storage and handling. Thus corresponding care is a prerequisite for their appropriate handling. Furthermore, local legal regulations may apply.

Detailed information is given in the respective **Safety Data Sheets**.

# About SONGWON Industrial Group

SONGWON, which was founded in 1965 and is headquartered in Ulsan, South Korea, is a leader in the development, production and supply of specialty chemicals.

The second largest manufacturer of polymer stabilizers worldwide, SONGWON operates group companies all over the world, offering the combined benefits of a global framework and readily accessible local organizations.

Dedicated experts work closely together with customers to develop tailor-made solutions that meet individual requirements.
